Tips and Tricks:

- **Mudding Roof:** Mix a diluted mud color by mixing acrylic paint with water for desired wash. Blot off excess water from brush on a paper towel. Brush mixture over shingles of roof and porch roof.
- **Sponging Bricks onto the Chimney:** Cut a tiny brick shape from sponge and submerge brick sponge into water. Squeeze out excess water. Apply paint to sponge and blot off excess paint onto paper towel. Sponge brick shape onto pre-painted surface in a brick pattern (Refer to photo).
- **How to Shingle a Roof:** Hot glue 1st row of shingles to the roof. Measure 3/4" from the bottom of shingles and with a pencil, draw a line across all the shingles in that row. Glue next row of shingles over first row, gluing the bottom of the shingle to the pencil line. If shingle needs to be cut to fit around a chimney, simply cut with scissors to the size needed.
- **Note:** DO NOT USE hot glue on screen door.
